Contact improvisation is a dance which originates in the 1970's and which has now spread throughout the world. It's easy to learn and very enjoyable. An improvised dance which has a fluid and dynamic form, and it's social dancing—not stage dancing. Suitable for everyone, whatever your age, gender or dance experience.

Combining contact improvisation techniques with traditional Argentine tango dancing, we expand our repertoire to create a modern tango for the 21st century: connected; challenging; surprising.
